In view of the newly filed claims of which many are now independent claims, restriction requirement between these claims is proper at this time.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 31-32, drawn to ball mill process and apparatus with non-spherical media, classified in class 241, subclass 2.
- II. Claims 33-35, drawn to ball mill process and apparatus with spherical media, classified in class 241, subclass 2.
- III. Claim 36, drawn to a process for ball milling a particular material, classified in class 241, subclass 2.
- IV. Claims 37-38, drawn to ball mill process and apparatus including a vial having an internal grill, classified in class 241, subclass 2.
- V. Claims 39-42, drawn to a ball mill kit, classified in class 241, subclass 184.
- VI. Claims 43-46, drawn to ball mill process using media of specific dimension, classified in class 241, subclass 30.

The inventions are distinct, each from the other because of the following reasons:

Group I does not require the roughened spherical media of Group II. Groups I,II,IV,V,VI do not require the specific material of Group III. Group IV does not require the specific media shapes of Group I. Groups I,II,III,IV,VI do not require the lysis buffer of Group V. Groups I,II,IV do not require the media size of Group VI. Group II does not require the internal grill of Group IV.

Restriction for examination purposes as indicated is proper because all these inventions listed in this action are independent or distinct for the reasons given above and there would be a serious search and examination burden if restriction were not required because one or more of the following reasons apply:

- (a) the inventions have acquired a separate status in the art in view of their different classification;
- (b) the inventions have acquired a separate status in the art due to their recognized divergent subject matter;
- (c) the inventions require a different field of search (for example, searching different classes/subclasses or electronic resources, or employing different search queries);
- (d) the prior art applicable to one invention would not likely be applicable to another invention;
- (e) the inventions are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election

Art Unit: 3725

shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention.

If claims are added after the election, applicant must indicate which of these claims are readable upon the elected invention.

Should applicant traverse on the ground that the inventions are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Ms. Norberg on 3/24/10 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
